

Double Handed Carry Clamps

[250kg as a pair]

The Double Handed Carry Clamps are the perfect solution for transporting stone slabs, steel plates or other hard materials by hand.

These double handed carry clamps come as a pair to help reduce the strain of manual handling when no powered lifting equipment is available. Made from aluminium, these carry clamps are lightweight and durable for use on many different types of applications.

These versatile clamps feature a working load limit of up to 500kg as a pair and are the perfect lifting aid for safely and easily carrying materials across site.

Key Features

- Capacity: 250kg (as a pair)
- Made from aluminium
- Lightweight and durable
- 0-60mm grip range
- Weight: 5.4kg (as a pair), 2.7kg each

Double Handed Giant Carry Clamps

[200kg as a pair]

The Double Handed Giant Carry Clamps have been designed to lift and move stone slabs, steel plates and other hard materials when no powered lifting equipment is available.

Featuring a lifting capacity of up to 200kg as a pair, these double handed clamps reduce the strain associated with manual handling and spread the load weight across multiple personnel.

The Double Handed Carry Clamps are made from long lasting, durable aluminium and feature heavy duty rubber handles allowing for a more comfortable grip. The clamp jaws also feature a rubber layer, to ensure maximum grip when transporting materials.

Key Features

- Capacity: 200kg (as a pair)
- Made from aluminium
- Lightweight and durable
- Robust rubber pads
- 0-100mm grip range
- Weight: 9.2kg (as a pair), 4.6kg each
