

## Grabber Clamp

[500kg]

The Grabber Clamp is the ideal solution to clamp and move slabs of stone, granite, marble, porcelain and even counter tops.

Featuring a capacity of up to 500kg, this clamp can be easily be attached to GGR's range of mini cranes and floor cranes and can even be attached to onsite tower or mobile cranes if required.

This innovative clamp benefits from an automatic open and close mechanism and is suitable for both natural and artificial stone up to a thickness of 20mm.

The Grabber Clamp features hard wearing rubber lined jaws across the clamp to help increase the grip but to also help prevent damage to the material being lifted.

### Key Features

- Capacity: 500kg
- Made from aluminium
- Lightweight and durable
- 0-20mm grip range
- Weight: 8.7kg

### Reference Code

MSL07

## Little Giant Lifter Automatic [1300kg]

The Little Giant Lifter has been designed to lift and move materials such as stone, marble, granite and steel.

This lifting clamp features an automatic opening and closing clamp mechanism, making it easy to move and place slabs/ plates etc to their install location. It is perfect for use on construction sites, workshops, warehouses and more.

Featuring a lifting capacity of up to 1300kg, the Little Giant Lifter is the ideal solution for use with GGR's range of mini cranes and floor cranes and can even be attached to mobile or on-site tower cranes.

It is suitable for both natural and artificial stone, or other flat materials in various thicknesses ranging from 10mm to 50mm.
