

Single Handed Carry Clamps

[100kg as a pair]

The Single Handed Carry Clamps are the perfect aid to lift and carry stone slabs in an upright position across construction sites, warehouses and workshops.

These single-handed clamps remove the strain associated with manual handling and only require one hand for each person, meaning two personnel can easily lift and handle heavy slabs.

The Single Handed Carry Clamps include a lifting capacity of up to 100kg as a pair. These clamps also feature durable, long lasting, rubber lined jaws to provide a firmer and increased grip to the materials being lifted.

Key Features

- Capacity: 100kg (as a pair)
- Made from aluminium
- Lightweight and durable
- 0-40mm grip range
- Weight: 3.1kg (as a pair), 1.55kg each

Single Carry Clamp [100kg as a pair]

The Single Carry Clamp has been designed to manually lift and transport small and medium sized slabs across construction sites, warehouses and workshops.

Featuring a lifting capacity of 100kg as a pair, these single handed carry clamps help reduce the strain associated with manual handling and make moving slabs independently both easier and safer.

Made from lightweight and durable aluminium, the Single Carry Clamp includes long lasting, robust rubber pads for added grip and to prevent damage to the materials being carried.

Key Features

- Capacity: 100kg (as a pair)
- Made from aluminium
- Lightweight and durable
- Robust rubber pads
- 15-50mm grip range
- Weight: 2.8kg (as a pair), 1.4kg each
