Single Scissor Lift Truck [500kg]

Introducing the 500kg capacity scissor lift truck, used to lift heavy materials from a height of 340mm to a maximum height of 880mm.

This hand powered scissor truck is operated using the pumping foot pedal for raising and the handle located on the lever for lowering. Fitted with solid durable polyurethane wheels to reduce the risk of damage to floors, this scissor truck is perfect for warehouse operations, manufacturing, workshops and much more.

With fixed wheels at the front and swivel wheels at the back (with brakes), the manoeuvrability of this little machine is perfect for confined spaces. The added benefit of the handle being foldable means that the scissor truck is also easily transportable and stored for future use taking up less space than needed.

Simple to use, strong and reliable are the hallmarks of this capable little machine.

Key Features

- 500kg capacity
- Table dimensions: 850x500x50mm
- Rear swivel wheels fitted with brakes
- Minimum/maximum lifting height: 340/880mm
- Foldable handle
- Durable polyurethane wheels
- Hand operated lowering
- Foot pump pedal operated raising
