Pallet Truck 2.5t [2500kg]

The Pallet Truck 2.5t from GGR Group is the perfect solution to transporting palletised goods around warehouses, shops, industrial sites, stores and more.

The truck comes complete with a robust chassis with a channel reinforced frame, forks manufactured from high quality steel, and a high performance hydraulic pump which offers a controlled lowering of the load.

A professional and ideal storage aid for a variety of manual transport tasks over short distances. Benefiting from tandem rollers to help spread the load on the floor surface and reduce ground contact loading by 50%.

This makes it easier to move heavier loads, reducing strain on the operator, protecting the rollers and pallets.

Unlike some powered pallet trucks the Pallet Truck 2.5t is also suitable for both open and closed board EURO, CHEP or UK pallets.

The Pallet Truck 2.5t from GGR really is a staple piece of kit in any workplace with palletised loads.
