

# Stone Lifters

## Screw Clamps With Rubber Pads [500kg & 1000kg]

This adjustable screw clamp has a 60-170mm wide jaw with rubber lined clamp faces to prevent scratches on polished stone or metal surfaces.

This popular rust-proof Screw Clamp is designed as a below-the-hook aid, ideally used in conjunction with ratcheted lever hoists or chain block and tackle.

Made from hard-wearing galvanised steel, 1000kg extra wide version is available with a jaw width of 70-260mm.

Four lifting points are provided to find the ideal centre of gravity to set your material at the perfect angle.
