

Lifting Solutions

GGR Brick Forks [2000kg]

Quickly move palletised blocks, bricks and other goods around site with the GGR Brick Forks, perfect for combining with a tower or mobile crane to raise loads from ground level to the upper floors or vice versa.

Featuring a maximum capacity of 2000kg and 3 different height positions for the mast allowing a load height of 1750mm, 1450mm or 1150mm.

The GGR Brick Forks come with adjustable forks to allow for differing pallet types, tie down points, a heavy duty sprung lifting eye that allows automatic levelling of the load being carried and a 3 hole lifting bail for adjusting the centre of gravity.

This lifting accessory comes supplied with net hooks and a load restraining net which should be used on all load lifts to add another layer of safety.

Key Features

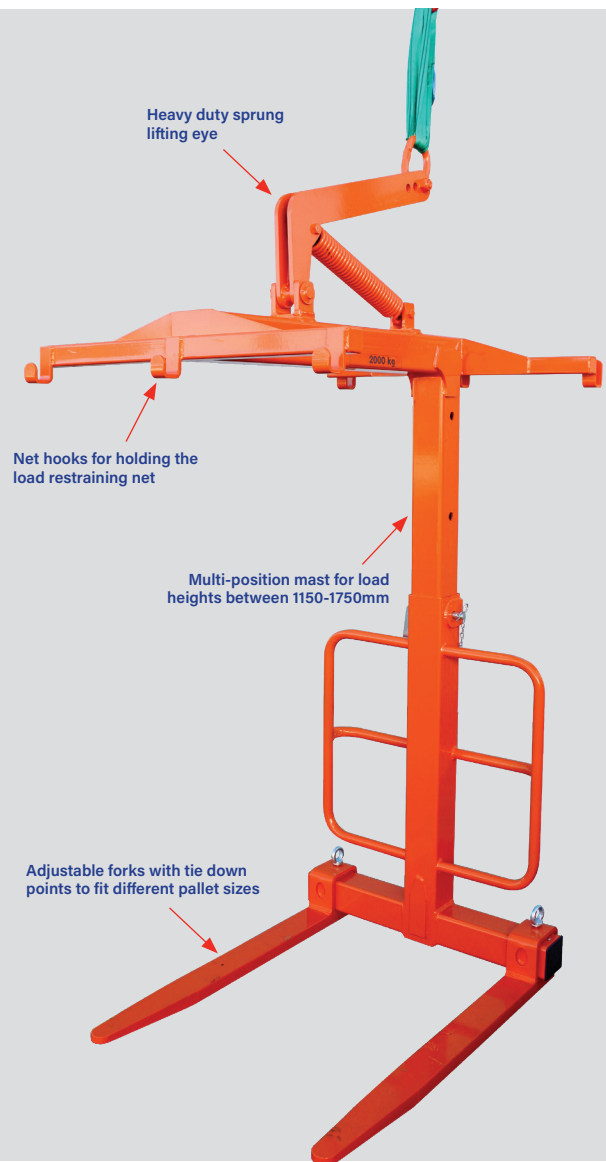

- 2000kg capacity
- Min load height: 1150mm
- Max load height: 1750mm
- Adjustable forks
- Weight: 198kg
- Multi-position lifting bail
- Net hooks and load restraining net as standard
- Fork dimensions: 1000mm (l) x 100mm (w) x 40mm (h)

Reference Code

LAH245

Technical Specifications

Safe working load	2000kg
Weight	198kg
Fork dimensions	1000mm (l) x 100mm (w) x 40mm (h)

The load restraining net is to be used on all lifts, please note that the net is not designed to catch a falling load.

Adjustable forks allow the user the option of move the forks to suit the pallet/load type.
