

Lifting Solutions

Fork Mounted Hook [4000kg]

The Fork Mounted Hooks from GGR offer owners of forklift trucks and telehandlers an economical and safe method of converting their machines into mini mobile cranes.

Featuring a maximum capacity of 4000kg and 2 different lifting positions along the blade (200mm and 600mm), the Fork Mounted Hook gives users a heavy lifting capacity and adaptability to suit their needs.

The Fork Mounted Hook from GGR comes complete with a single swivel hook and bow shackle, zinc plated heel pins and a safety retention chain with screw carabiners for safe attachment to the truck or telehandler.

Supplied bright orange for safety and with a maximum fork section of 150x50mm at 481mm centres the Fork Mounted Hook is perfect for use in busy workshops, construction sites, trade supply yards, government supply depots and much more.
