

Stone Lifters

Stone Vac GSK420 [420-630kg]

The Stone Vac GSK420 is one of our newest stone vacuum lifters, capable of lifting stone panels, blocks, bricks, pavers, and kerbs weighing from 420kg to 630kg (depending on the lifting point used).

The Stone Vac GSK420 has a constant running vacuum system that can lift varied stone materials such as porous limestone, polished granite, and marble in both vertical and horizontal positions.

There are no complicated cords to deal with when using this below-the-hook stone vacuum lifter because it is powered by a rechargeable battery.

Key Features

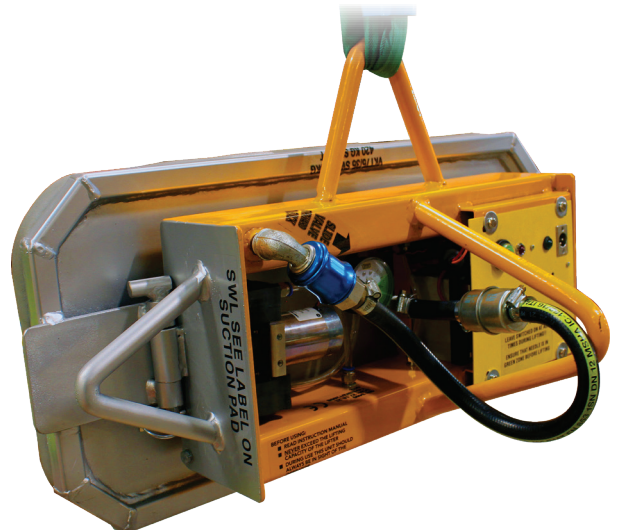

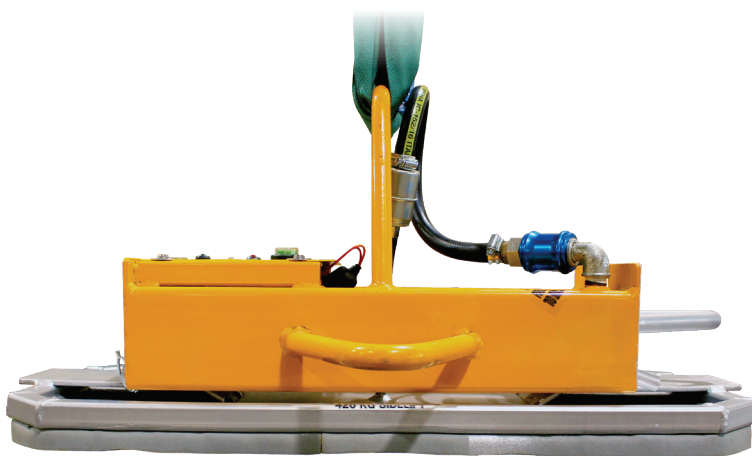

- Capacity: 420-630kg (depending on lifting point)
- Dimensions: 492mm (l) x 260mm (d) x 250mm (h)
- Constant running single circuit vacuum system
